Virtual Neighborhood Information Presentation

2021 Street Rehabilitation Project No. ST2021-01

To: Property Owners and Residents

September 17, 2021

From: City of Fridley Engineering Division

The City is considering street and utility construction in your neighborhood in 2022.

To introduce you to our plans, Engineering staff typically hosts an open house to present project information and answer questions you may have about the project. Due to meeting restrictions caused by Coronavirus (COVID-19), our staff has created a virtual presentation for you to watch to receive information for this upcoming project. The presentation can be found on the Project webpage on the City's website here: <https://fridleymn.gov/1586/16360/2021-01-Street-Rehabilitation-Project>

We encourage you to take the time to review the 15 minute presentation, which provides instructions on how to subscribe to project updates and provides opportunities for feedback and information via a questionnaire. Once you have viewed the presentation, please call us at 763-572-3554 or email web-streetprojects@fridleymn.gov for questions or comments regarding the project.

If you are considering replacing your driveway or utility services soon, please contact us to discuss coordinating the work. Scheduling this work in conjunction with our project may save you money.

Included with this letter is a questionnaire regarding additional requests for information about your property on installed irrigation systems, pet fence, or an in-home business. It is our intention to protect those installations and provide access during construction.

Please check the webpage for the latest information and sign up for the project notifications. Thank you for your patience and understanding as we work to connect you with this important information during this difficult public health situation.
